

Compliance assessment for Sample Company

KRS Solutions · Katia Rojas Sandoval · 19 August 2026

Executive summary. This report classifies each AI system against Regulation (EU) 2024/1689 across independent dimensions (prohibited practice, high-risk, transparency, GPAI), using a deterministic rule engine. Each conclusion cites the provision that triggered it and its certainty. This is a decision-support tool, not legal advice or certification.

Missing evidence

The description did not establish the facts below. They were left unresolved rather than assumed — confirm them before relying on this assessment.

- cannot rule out without more facts — Art. 5(1)(a), Art. 5(1)(b), Art. 5(1)(ba), Art. 5(1)(bb), Art. 5(1)(c), Art. 5(1)(f)
- depends on interaction/output — Art. 50(2), Art. 50(4)

HUMAN REVIEW REQUIRED before this is relied on. Reason: the ANNEX_III determination carries the heaviest duties. Confidence in this assessment is **medium**.

Recommended actions

- Assign human oversight to named, trained staff and confirm you can retain the system's logs for at least six months (Art. 26).
- If the system is used at the workplace, inform workers' representatives before it goes live (Art. 26(7)).
- Confirm the missing facts listed above before finalising the classification.

Based on Regulation (EU) 2024/1689 (Annexes I & III, Article 5, GPAI rules) and the curated knowledge base. Classification is deterministic; fact extraction from the description may be incomplete — see missing evidence.

How this assessment was produced

Classification is **deterministic**. A language model extracts structured facts from the description you supplied; it does not decide the outcome. A rule engine then applies Regulation (EU) 2024/1689 to those facts, and every conclusion above cites the provision it rests on, quoted verbatim from the consolidated text. The same facts always produce the same result.

The remaining error surface is therefore fact extraction — whether the description was read correctly. That is measured against held-out labelled cases and reported with confidence intervals; figures are in the project README under *Evaluation*. Facts that could not be established are listed as missing evidence rather than guessed.

What this assessment does not cover

- **Administrative fines (Art. 99) are not modelled.** No penalty exposure is estimated anywhere in this report.
- **Obligations of downstream GPAI providers** beyond the Art. 3(68) distinction are not fully modelled.

- **Ambiguous provisions are not resolved.** Where the Act admits more than one reading, the engine applies one reading and flags the conclusion for review; it does not adjudicate the ambiguity.
- **National implementing law and sectoral regimes** outside those noted are not assessed.
- **This is not a conformity assessment** under Art. 43, and it is not evidence of compliance for any authority.
